NGUYEN DANG HUY

FRONTEND DEVELOPER

Email: nguyendanghuy071195@gmail.com   **Phone:** 0363792188

DOB: 07/11/1995   **Website:** https://huynd.it.com

Address: So 24, ngo 148, Hoang Ngan, Trung Hoa, Cau Giay, Ha Noi

CAREER SUMMARY

Frontend Developer with 4+ years of experience specializing in React.js and Next.js. Proven expertise in building scalable, high-performance web applications with modern frameworks and tools. Strong focus on SSR/SSG optimization, responsive design, and seamless API integration. Passionate about creating exceptional user experiences and staying current with emerging technologies.

CORE TECHNICAL SKILLS

Frontend Frameworks	React.js, Next.js 13+ (App Router, SSR, SSG, Server Components), Vue.js
Languages	JavaScript (ES6+), TypeScript (Advanced), HTML5
State Management	Redux, Redux Toolkit, Zustand, Context API, React Hooks
Styling	Tailwind CSS, SASS/SCSS, Styled Components, CSS3
UI Libraries	Ant Design (Antd), Material-UI (MUI), Custom component libraries
Animation	Framer Motion, CSS animations
API Integration	RESTful API, GraphQL, Complex endpoint integration
Performance	SEO optimization, Lazy loading, Code splitting, Web Vitals
Responsive Design	Mobile-first approach, Cross-browser compatibility
Version Control	Git, Git Flow, GitHub, GitLab
Backend Knowledge	Node.js (Express.js), PHP (Laravel), Socket.IO
Databases	MySQL, PostgreSQL, MongoDB

PROFESSIONAL EXPERIENCE

React.js Developer (Client-Side) | NTQ Solutions

August 2025 - Present

Project: Social Networking Platform

Team: 20 members (5 FE, 6 BE, 4 QA, 2 BA, 3 DevOps)

Tech Stack: React.js, TypeScript, Redux Toolkit, Tailwind CSS, Socket.IO, WebRTC

Key Responsibilities & Achievements:

- Developing large-scale social networking platform with real-time features for enterprise clients
- Implementing real-time chat and video call functionality using Socket.IO and WebRTC
- Building responsive user interface with React.js and TypeScript for type-safe development
- Integrating real-time notifications system for user interactions and updates
- Collaborating with large cross-functional team using Agile/Scrum methodology
- Implementing state management with Redux Toolkit for complex application state
- Optimizing performance for real-time data streaming and video calls
- Participating in code reviews and maintaining high code quality standards

Core Features Delivered:

- Real-time messaging system with typing indicators and read receipts
- Video and audio calling functionality with screen sharing
- User profile management and social connections

- News feed with infinite scroll and real-time updates
- Notification system for user activities
- Media upload and sharing capabilities

Frontend Developer | MaxTrust

June 2023 - August 2025

Project: E-Commerce & Logistics Management Platform

Team: 7 members (2 FE, 2 BE, 2 QA, 1 BA)

Tech Stack: Next.js 13+, TypeScript, Tailwind CSS, Ant Design, Redux Toolkit, SASS

Key Achievements:

- Developed responsive web application with Next.js App Router and Server-Side Rendering (SSR) for improved SEO and performance
- Implemented Static Site Generation (SSG) for product pages, reducing load time by 40%
- Built Chrome extension for seamless product selection from multiple e-commerce platforms
- Integrated complex RESTful APIs for real-time tracking, user management, and order processing
- Utilized Ant Design components with custom theming for consistent UI/UX
- Implemented Zustand for lightweight state management across the application
- Optimized responsive design for mobile, tablet, and desktop devices
- Collaborated closely with designers to implement pixel-perfect UI components

Core Features Delivered:

- Real-time order tracking and shipment management
- Multi-level package management system
- Payment gateway integration
- User authentication and authorization
- Shopping cart with dynamic pricing
- Admin dashboard with analytics

Frontend Developer (React.js/TypeScript) | VelaCorp Company

November 2021 - April 2023

Project 1: Logistics User Management System

Team: 7 members | Tech: React.js, TypeScript, Tailwind CSS, Redux Toolkit, SASS

- Built admin portal for managing customer data and service subscriptions
- Implemented notification system for policy updates and rate changes
- Developed user whitelist/blacklist functionality with role-based access control
- Utilized SASS for maintainable and scalable styling architecture
- Applied Git Flow for version control and collaborative development

Project 2: Unified E-Commerce Platform

Team: 7 members | Tech: React.js, TypeScript, SASS, Redux, Ant Design

- Shopping cart, checkout, and payment processing
- Order and transaction management with complex state management using Redux
- Delivery request tracking and multi-platform product aggregation (Shopee, Lazada integration)
- Responsive design optimized for all devices

Project 3: Admin & Staff Management Portal

Tech: React.js, TypeScript, Tailwind CSS

- Developed comprehensive admin interface with advanced filtering, sorting, and data visualization
- Built role-based permission system for staff access control

Project 4: Chrome Extension for Product Selection

Team: 4 members | Tech: JavaScript, Chrome Extension API, React.js

- Built Chrome extension supporting Tmall, Taobao, 1688 platforms
- Implemented product data scraping and integration with main platform cart system
- Enabled multi-account management within extension

Fresher Node.js & Blockchain Developer | VMO Company

June 2021 - November 2021

Team: 10 members | Tech: React.js, Node.js, Blockchain, Smart Contracts

- Developed web application for token creation via smart contracts

- Built lending/borrowing platform based on VENUS protocol
- Supported frontend bug fixes for production satellite projects

Fresher PHP Developer | MOR JSC Company

May 2020 - April 2021 | Tech: PHP, Laravel

- Developed outsourcing projects using Laravel framework
- Learned full-stack development fundamentals

EDUCATION

PHP Developer Bootcamp | CodeGym - Programming Training Center

May 2019 - November 2019

Intensive bootcamp focused on PHP development

Programming Fundamentals (HTML5, CSS3, PHP, Java) | BKAP Hoang Quoc Viet

May 2016 - 2018

2.5-year comprehensive programming course covering foundational languages and web development

CERTIFICATIONS

- Bootcamp Course - CodeGym VN (November 2019)
- Udemy Certifications: Advanced React & State Management, TypeScript Masterclass, Styled Components Course
- Multiple Udemy courses for continuous skill improvement (2020 - Present)

LANGUAGES

Vietnamese: Native

English: Intermediate (Reading: Good | Writing: Good | Listening & Speaking: Basic)

ADDITIONAL INFORMATION

Hobbies: Listening to music, E-sports (League of Legends), Coding side projects
Strengths: Quick learner, Problem-solving, Attention to detail, Proactive communication
